

Overview:

The field at Paideia School 15 needs rehabilitation and design for improved drainage system. The scope of the project includes installation of sod in grass areas of the field, upgrade stormwater drainage systems along the north and east sides of the field to eliminate run-off onto the field and erosion of infield and grass surfaces, and upgrades to existing sprinkler system to ensure full coverage of new sod areas.

This resolution is to assign Fuller and D'Angelo P.C. Architects and Planners to provide architectural engineering services for "Field Rehabilitation and Drainage Upgrades" at Paideia School 15 for in amount of \$16,500.00 which includes owner directed additional service allowance of \$5,000.00.
