

Appendix F – Resources for the Family (Webpage Section)

A lot of conversations have taken place about the need to create a presence for parents/families on the Yonkers Public Schools website. This was one of the primary goals agreed upon when entering into this contract. Switching to Schoolwires to host the district website meant creating everything from scratch and of course resources were limited. I was included in the staff training and immediately began to create a section of the website dedicated to parent/families. We finally agreed upon calling it **Resources for the Families**.

I diligently and methodically curated basic information that parents could make use of. Nothing self-made, just creating links to existing sections of the website on one page for easy access or uploading documents from reputable organizations used nationally, Center for Disease Control, National PTA e.g. I had the pleasure to work with Ms. Elyse David to assure it was all in line with district standards. Having received no feedback after months of repeated requests I ceased working on it as it will need to be updated on a continuing basis. I hope this will be addressed when time allows.

Below is the list of individual sections created with this section. If you are interested in seeing more on paper or physically I would happy to show you.
